

Product description

The E-PURE ASPRA S400 permanently removes viruses, bacteria, harmful dust, fine dust, pollen and fungi from the air in the room. Due to the standard integrated active carbon filter, the air purifier also removes gases and odors from the air.

The E-PURE ASPRA S400 is specifically designed for air purification in spaces smaller than 200 m³ such as small shops, waiting areas, offices, elevators, consultation and treatment rooms, hallways etc.

We offer three types of this filter:

1. S400-L - Lite model with an on/off switch.
2. S400-M - Medium model with a speed variator.
3. S400-S - Smart model which measures the air quality in the room and controls the air purifier accordingly.

The E-PURE ASPRA products are tested by individual institutes such as TNO, VITO and ECN. Their results confirm the technology is very effective for the removal up to 99% of all atmospheric particles between 0.1 and 10 micron.

Benefits

- Efficient removal of fine dust
- High filtration efficiency (99%)
- Captures and kills viruses
- Outperforms HEPA technology
- Healthy clean indoor air
- No risk of fungal growth and mold
- Mobile air purification (plug-and-play)
- Low noise level
- Low energy usage and cost effective
- Low maintenance costs

What will be removed from the air?

Fine dust Viruses Bacteria Fungi Smells Gases
