

CGZA Suction arm

CGZA Suction arm

The CGZA suction arm is designed for the suction of fumes and light particles during a process.

It is mounted on a metal support with magnet and can easily be connected to a flexible hose (the use of a hose ring is recommended).

Material

PE hose with aluminum hood.

Type

Mounted on foot with magnet. With one smooth side to connect onto a flexible hose.

Type	Code	d1 Ø mm	d2 Ø mm	Weight kg
