

BZZ Caps for inspection branches

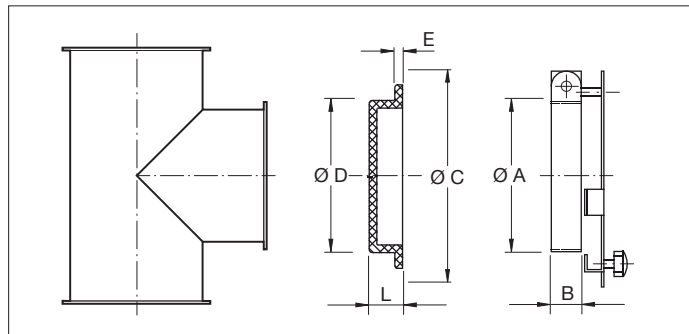

BZZ Caps for inspection branches

Rubber caps for inspection branches that insure airtightness of the opening. They can also be used as an end cap in an installation.

These can be fitted with a cap lock to ensure that rubber cap stays in place (especially used in overpressure installations).

These caps are suitable for the transport of waste materials such as dust and chips but also for the transport of grains and such.

Material

TPE rubber (black) or food-safe TPE rubber (white).
Working temperature range : -50°C to +100°C.
Lock in untreated AISI 304.

Type

Preformed TPE rubber with edge.

Options

- none
