

**BABA Bends R=2D 60°**

**BABA Bends R=2D - 60°**

The pressed bends are made of two preformed halves and longitudinally fully welded together with a sheet thickness of 2.00 mm.

The segmented bends are made of welded segments fully welded together.

These bends are suitable for the transport of waste materials such as dust and chips but also for the transport of grains and such.

They are only available in R=2D. If a situation requires other radiuses, these can be done in segmented versions.

**Material**

2.00 mm black steel 1.0330 powder coated in RAL 7032. Electrostatically conductive and food-safe powder coating thickness of 30 to 60 µm. Temperature resistance up to +80°C.

**Type**

Pressed or rolled sheets with 6 mm edges for lock rings.

**Options**

- FDA and EU compliant food-grade quality
- hot-dipped galvanized or stainless steel execution
- wear resistant lining as of Ø150 (83° Shore), only on segmented models
- equipotential equalization
- other colors
- other diameters
- other sheet thickness, depending on radius and diameter
- other types of edges or connections

\* Segmented models
